53 & 55 SPARKS STREET

OTTAWA, 1st September, 1907.

HEREWITH we present our Twelfth Annual Bulb Catalogue and beg to thank our numerous customers for their continued liberal patronage. We also assure them that we shall make every effort to warrant a continuance of their confidence.

As we use large numbers of Bulbs in our greenhouses, and being aware of the fact that the "best is the cheapest in the end," we buy what is termed Florists' Stock, not Seed House Stock. There is a difference; our customers get the benefit of the difference.

Owing to the large increase in our Plant and Cut Flower business, we have again increased our glass area at Sunnyside Greenhouses, Rideau Terrace, and are now in a better position than ever to execute satisfactorily all orders for Floral Work, Cut Flowers and Plants entrusted to us.

At prices quoted on dozen rates and under, we shall forward bulbs free of charge to any address in Canada. Bulbs catalogued at 100 rates, plants and other articles expressed at customer's expense.

GRAHAM BROS.

HINTS ON BULB CULTURE

The bulbs enumerated in this catalogue (particularly the Dutch and French) may, for the purpose of the amateur, be divided into three classes, viz:—1. **Those best adapted for house culture.** 2. **Those best adapted for the garden,** and 3. A combination class—**Those adapted for either the former modes.** The first named class may again be divided into early and late blooming bulbs, the former being available at or before Christmas, and the latter from the middle of January until April or May. For Christmas blooming, only Early Roman Hyacinths, Paper White Narcissus and Chinese Sacred Lilies should be planted. For general house culture the foregoing, together with the various Hyacinths, Polyanthus-Narcissus and Daffodils, may be successfully grown. While large numbers of Tulips are grown by florists for winter flowers, the average amateur will find them difficult to manage.

For house culture pans are more effective than pots: a 5-inch pan holding one Dutch Hyacinth; a 6-inch pan holding five Roman or Dutch Pan Hyacinths, and for Narcissus larger pans should be used.

When planting use any **light, moderately rich soil** (avoiding any manure that is not thoroughly decomposed). We can supply a Special Compost at 25c. per bushel. Fill the pots or pans loosely almost to the top, press the bulbs into the soil so that only about one-quarter will show above the surface, strike the pot sharply to settle the soil, water thoroughly and place away in **a cool dark situation.** The ideal situation is outside (their native soil) covered with sufficient leaves or other material to prevent severe freezing. But as in winter they are somewhat difficult to get at if treated thus, the next best place is a **cool** cellar. The bulbs being **covered with three or four inches of leaves, sawdust or sand to exclude the air** and retain moisture.

Examine them occasionally to see that they do not become dry, and keep them two or three months in the dark before bringing them to the light. As the leaves and flowers develop do not stint the water. Keep them cool even then, and they will help to cheer the winter's gloom wonderfully. Freesias and Easter Lilies do not require to be started in the dark.

HYACINTHS GROWN IN GLASSES.

For glass culture the Highest grade bulbs only should be used. Clean out your glasses thoroughly. Fill the glasses nearly full with soft water, and place the bulb **so that its base nearly touches the water.** The glasses may then be placed in a box in a cool, dark cellar, and covered with leaves as before mentioned. Look at them now and again and replenish the water if it is offensive, keeping it up to the same level, but **not in direct contact with the bulbs** or the latter may rot. Leave your glasses in this position for two months or more, bringing them into the light to flower as they are wanted.

BULBS GROWN OUTSIDE.

Hyacinths, Tulips of all kinds, Crocus, and many varieties of Daffodils, are perfectly hardy outdoors. For outside culture (the Tulip being pre-eminently the most popular), plant thickly and deeply—six inches apart and six inches deep—except Crocus and other small bulbs, which should be planted at less depth—early as possible in October. Cover with a few inches of litter the end of November. Remove same first thing in spring, and nature will do the rest.

ONE DOLLAR COLLECTIONS

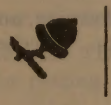
Of High Grade Flowering Bulbs

For the benefit of those who are at a loss in selecting suitable bulbs for House and Outdoor Culture, we offer the following collections of what, in our own experience, we consider the most satisfactory varieties.

On the receipt of $1.25 we will mail either collection to any address in Canada. When not posted, price $1.00 each.

Collections for House Culture

6 Early Roman Hyacinths
6 Dutch Hyacinths
6 Pan Hyacinths in two colors
6 Paper White Narcissus
6 Best Forcing Tulips
6 Trumpet Princeps Narcissus
6 Mammoth Freesias



Collections for Outdoor Culture

25 Double Mixed Tulips
25 Single Mixed Tulips
50 Crocus, Giant Flowering
25 Double Parrot Tulips
25 Narcissus Poeticus Ornatus

The above bulbs must not be confounded with the low grade cheap bulbs generally sent out in collections.

OURS ARE STRICTLY FIRST CLASS.

The Bulbs on this page should be planted as early in September as is convenient

FREESIAS

Refracta Alba

or African Lily of the Valley

Easily cultivated indoors and one of the prettiest and sweetest scented winter flowers.

This is really not a bulb, but a corm, consequently should not have the cold, dark treatment of Dutch bulbs. Plant 6 or 12 in a pot and grow in the light from first to last. Water sparingly until well established.

Mammoth Bulbs, 20c. per doz., $1.25 per 100

Freesia

Early Roman Hyacinths

Roman Hyacinths are the only Hyacinths that will bloom satisfactorily for Christmas.

Roman Hyacinths should be planted as early as possible; from 3 to 6 bulbs in a pot make a good display.

Extra Selected, 13 to 15 centim: 6c. each, 50c. per doz., $3.50 per 100.

First size, 12 to 15 centim: 5c. each, 40c. per doz., $3.00 per 100.

In all classes of Hyacinths we will sell 25 Bulbs at the 100 rate.
By Express only at Purchaser's expense.

Lilium Harrisii, or Easter Lily

Are the first bulbs to arrive. They should be potted as early as possible.

These bulbs this season are solid and healthy.

This is the best and most floriferous lily for winter blooming, and is one of the most profitable flowers that can be grown by florists. Excellent for pot culture.

TRUE BERMUDA GROWN BULBS

	Per Doz.	Each.
Bulbs 7 to 9 in. in circumference	$1 25	15

Queen Wilhelmina—Blue, exquisite flower	20
Schotel—Light porcelain blue, very fine	25
Snowball—Pure white, very fine spike	15
William III—Dark blue, splendid spike	20

Pan Hyacinths

Sometimes called Dutch Roman Hyacinths. They are not Roman Hyacinths, however, but the regular Dutch Hyacinths, same as other named varieties, except that the bulbs are younger and smaller. They are an extremely pretty class, giving a fine effect when from 4 to 10 bulbs of one variety are planted in a pan.

Sent prepaid by mail at single and dozen rates.

	per 100	Doz. cts.	Each cts.

Spike of Single Hyacinths

Choice Named Hyacinths

Specially selected for growing in glasses with water or forcing in pots. Free by mail at dozen rates or under, $6.00 per 100 (25 bulbs at 100 rates) by express at purchaser's expense.

IMPORTANT

To give best results, Hyacinths must be thoroughly rooted before being exposed to heat and light. Do not attempt to force them until after Christmas.

DECORATIVE PLANTS

For Conservatory and House Culture

Azalea Indica—We offer a fine selection of well-shaped specimens of these showy plants. 1st size, $1.25; large size, $1.50 each; extra size, $2.00.

Asparagus Plumosus—One of the finest decorative plants, not only for its elegant and graceful foliage, but for its durability when cut. 25c. each.

Asparagus Sprengeri—A beautiful variety of graceful, drooping habit, especially adapted for a pot plant. 10c. and 20c. each.

Araucaria Excelsa (Norfolk Island Pine)—Unrivalled in the plant world for symmetry of form; grace and beauty of foliage. 1st size, $1.00; larger plants, $2.00; extra size, $3.00 each.

Begonias—Including Rex in variety, Metallica, Thurstoni, De Lesseps, Incarnata, Vernon, Alba Picta, etc. Small plants, 10c. each; fine plants for table or window decoration, 25-50c. each.

Chrysanthemums—Nice stocky plants of the varieties most suitable for pot culture (season of blooming from middle of October to end of November). 6 and 7-inch pots, 70c. and 75c. each.

Cyclamens—These beautiful plants are a wealth of rich bloom during the winter. 50c. and $1.00 each.

Dracæna Indivisa—(Fountain Plant)—Fine hardy and graceful plant for house culture. 25c. to 50c. each.

Ferns—Our stock of house ferns this season is large, varied and in fine condition. We offer only those varieties that are most suitable for house culture, including Adiantum Cuneatum, Cyrtomium, Nephrolepis Piersonii, Nephrolepis Bostoniensis (Boston Fern), Nephrolepis Cordata Compacta (Sword Fern), Nephrolepis Scottii, Pteris Cretica, Pteris Ouvrardi, Pteris Tremula, Magnifica, Aspidium, etc. Plants, 10c., 15c., 25c., 40c., 50c., 75c., $1.00 and $1.50 each.

Cyclamen Grandiflorum

Boston Fern

FERNS IN PANS—These are constantly growing in popularity for table and window decoration. We can supply pans of mixed ferns prettily arranged at 30c., 40c., 50c. and 75c. each.

Primulas—There is probably no blooming plant grown that will give so much pleasure for so long a season, with so little care and expense as a Primula. Our stock this season, from high grade seed, is very promising. Price, 25c. each.

Primula Obconica—A profuse blooming primrose bearing on long spikes 10 to 15 flowers; white, shading to blue, 25c. each.

Rubber Plants (Ficus Elastica)—One of the finest plants for parlor decoration. Its thick, leathery leaves enable it to stand excessive heat and dryness, while their imposing size and deep glossy green always present a cheerful and effective appearance. Price, plants 10 to 12 inches high, 50c. each; 15 to 18 inches high, 75c. each; plants 2 to 2½ feet high, $1.50.

Pandanus Utilis (Screw Pine)—Large plants of these are very handsome. Price, 50c.

Pandanus Veitchii—A finer and variegated form. $2.00 each.

Asparagus Plumosu

Dracæna Indivisa

Latania Borbonica

PALMS

Palms have become an almost indispensible feature in all decorations, whether for apartments, conservatories or window gardening. We have, this season, a larger and better stock than ever before. The varieties we offer are selected as being the best adapted to general cultivation in house or conservatory.

Cocos Weddelliana—This beautiful palm is unquestionably the most graceful in cultivation. It is admirably adapted for centres of jardiniers, and for dinner table decoration it cannot be excelled. Price, 50c., 75c., and $1.00 each.

Kentia Belmoreana—This, and the following, are undoubtedly the most satisfactory and most effective for house culture. They are capable of standing more ill usage than any other class. Price, $5.00, $3.50, $2.00, $1.25 and 50c. each.

Kentia Fosteriana—A more vigorous grower than the preceding variety, plants the same price averaging about one-quarter larger than it, otherwise the appearance is almost identical. Price, $5.00, $3.00, $2.00, $1.25, 50c. and 25c. each.

Latania Borbonica—This is the typical Palm, and has, perhaps, in the past, been more largely used than any other. Its large, deeply-divided fan-shaped leaves are very attractive, while the plant is extremely hardy. Price, $2.50, $1.50 and 75c each.

Phœnix Reclinata—A large growing, graceful palm of easy cultivation, large specimens being especially effective. Price, $3.00 and $1.50 each.

JAPANESE PÆONIES

Double Herbaceous Pæonies

The most important of herbaceous perennials, perfectly hardy, not troubled with insects or disease, and once planted, take care of themselves, increasing in size and beauty each year.

A fine collection of named varieties, whites, pinks and crimsons. **25c.** each; best 10 for **$2.00.**
